

COMMERCIAL AFFAIRS.

MONEY MARKET.

The market opened heavy this morning. At the first board prices ruled heavy, current at the close yesterday, but after the board they slightly rallied, and stocks were a little better. Railroad bonds were especially in some extent, particularly Erie convertible, 1862 and 1871. The stock market is getting weaker daily, not that any great depreciation in prices has been realized, but the disposition among outsiders to purchase is getting less daily, and we should not be much surprised to see a dull, inactive state of things set in, that would depress prices very materially. Any attempt should be made by any large holder to realize. At the first board today, Nicaragua declined 1/4 per cent; Morris Canal, 1/4; Harlem, 1/4; St. John, 1/4; Long Island, 1/4. At the second board, General Company went up 1/4 per cent; New Jersey Zinc, 1/4; Harlem, 1/4; Reading Railroad, 1/4; Erie Railroad, 1/4. The market closed with an upward tendency. There are, however, some sporadic efforts of the bulls, and afford opportunities for the small holders to realize, which are to a great extent made available. Outsiders not already involved in the stock speculations of the day, are not disposed to enter at present prices; and as there are no purchases for delivery on contracts maturing, we do not see where a demand is coming from to relieve present holders.

The steamship Daniel Webster, from Nicaragua, with ten days later news from California, is nearly due. She will bring dates to the 14th of April, inclusive. We anticipate most favorable intelligence by this steamer.

The most extraordinary financial movement of the day is the decision of the Court of Appeals to-day, declaring the Union loan of nine millions unconstitutional. This will spread consternation and alarm among the political financiers at Albany; and we shall see all sorts of squabbling among these canal contractors who have been so loud in their cry for the spoils. This is a final settlement of the questions. Unfortunately, the Legislature has adjourned, and all will be chaos and confusion. The Governor may call an extra session of the Legislature this year, to go to work in a legal, constitutional way, and make a law authorizing the loan. Last year he called an extra session to pass the present unconstitutional law. It will be curious to watch the course of these Albany politicians. They are in a tight place. They will find that, after all, directly is not better policy. To carry out the policy of the Government, as far as possible, the Comptroller was authorized to receive these canal certificates on deposit for the issue of circulating notes, and several banks have given no other security but this for bills received from the Comptroller. The decision of the Court of Appeals destroys, at once, this security, and these bank bills are worth no more than some beautifully engraved paper. We have frequently cautioned the public against these canal certificates. We have, time and again, declared them unconstitutional, and predicted the result we now have the pleasure of recording.

The receipts at the office of the Assistant Treasurer of this port, to-day, amount to \$30,219.49; payments, \$13,620.94—balance, \$16,598.55.

The Trust Company of New York has declared a dividend of sixty-eight cents on the stock of the company.

The receipts of the Michigan Central Railroad Company, for the month of April in each of the past two years, were as annexed—

Michigan Central Railroad.	1851.	1852.
Receipts for freight.....	\$39,840.94	\$21,511.21
Receipts for passengers.....	\$3,046.95	\$3,583.24
Total receipts.....	\$42,887.89	\$25,094.45
Expenses.....	\$42,887.89	\$25,094.45
Balance.....	\$0.00	\$0.00

The decrease in the business of 1852 is owing to the effect which the long delay in the opening of navigation has had on trade throughout the whole West.

The Buffalo, Corning, and New York Railroad Company will offer for sale at auction, in the Merchants' Exchange, to-day (Wednesday), four hundred thousand dollars of first mortgage bonds, payable in 1867, with seven per cent interest, and semi-annually at the Bank of Commerce in this city. This is a legitimate loan of bonds, properly secured, and the companies we have mentioned relative to county bonds issued for railroad companies, do not apply to these. First mortgage bonds, issued by a railroad company as favorably located as the Buffalo and Corning road, are among the best securities of the day. In fact, we know none better. Holders have the first lien upon the entire property of the company, and all future expenditures on the road serve to increase and strengthen the security. The above issue of bonds is a part of one million, authorized to be issued for the purpose of completing this road, and are secured by a first mortgage on the entire road and its franchises, by deed of trust to John A. Stevens, James S. T. Stranahan, and John A. C. Gray, as trustees, and are convertible into the stock of the company, at par, at any time within five years from their date.

The State of Pennsylvania is in the market for a loan. The Philadelphia Ledger says—

The Secretary of the Commonwealth has given notice that proposals will be received at the State Treasury until the 12th of June next, for the North Branch Canal loan of \$500,000, at a rate of interest of six per cent, payable half-yearly, in specie or its equivalent. This loan is for thirty years, and is exempt from taxation on any property owned by the State, and will be issued in coupons attached, and will be issued in sum of one, five and ten thousand dollars.

Bidders for the loan will remember this fact, and shape their proposals accordingly, which must state explicitly the amount proposed to be taken, the lowest rate of interest, and the premium; but no smaller fraction than 1/4 per cent will be entertained as a bid. The loan reserves the right to accept the whole or any part of the sum offered, unless the proposal stipulates to the contrary. This will be one of the most important loans of the year, and will not doubt elicit the attention of foreign capitalists. The law limits the rate of interest at 6 per cent, though we have no doubt it will be taken at considerably less than 6 per cent, as it is a legitimate loan. The fractions in the rate of interest are limited to the larger parts of a dollar; that is, the proposal must name 5 per cent, will be 4 per cent, or 3 per cent, &c., &c., will not be considered. One-third is payable on the acceptance of the proposal, one-third in thirty days, and one-third in one hundred and twenty days.

The totals received on all the new gold plate canals, in the month of April in each of the years 1851 and 1852, were as follows—

1851, from 15th to 30th April, 15 days.....	\$207,807
1852, " 20th to 30th " 10 days.....	131,501
Falling off.....	\$166,696

There are several reasons for this diminution. In the first place, the canal opened five days later this year. Lake Erie opened the first of April last year, and was not open before the first of May this year. The late opening of the lake, which kept boats at Buffalo, and the breaks at Medina and Albion, prevented boats from taking return cargoes from side water before the first of May, thus diminishing the tolls at both ends of the Erie canal. In addition to these reasons, the railroads having been freed from toll, took a much larger amount of material than usual during the suspension of navigation.

The annexed statement exhibits the operations at the branch mint of the U. S. at New Orleans, during the month of April, 1852.

Fall one-half of this port was compensated by a larger portion than usual, of the handsouth. For some time past the value of the ton, exported from this port has been in the hood of one million of dollars per week; and active movement in cotton, it would have siderably below that small sum. The imports, in time comparatively large, for the season, at prevailing importations that specie will go forward the summer in large amounts. In the year June 30th, 1851, the value of imports into the (principally into this port), amounted to \$ 226,224,932, and the exports amounted to \$ 221,978,478. It appears by this that the ton, imported into this port, was considerably less than the exports, was cleared from this port. This gives a pretty good idea of the position, occupies in the foreign trade of the country.

279	portance of all official tables exhibiting from	
280	the commercial movements of this port. In	
285	of this, the above statement is a valuable	
290	merchant, as it shows what quantities of cer	
293	have been sent to certain ports during a cer	
294	They can tell by this whether the markets	
295	stocked or not—whether it will do to continue	
296	ments, or wait for the consumption of the	
297	made.	
298		
299	the recent report of the treasurer of the Ver	
300	railroad Company has not had a suffi	
301	fluence upon the market value of the stock. T	
302	financial statement was presented at the last	
303	stockholders.	
304
